ANTHEM PG 7-10

ASPIRE PG 11-14

INSIGNIA PG 15-18

THE QUIETEST RIDING, BEST HANDLING COACH ON THE MARKET TODAY. PERIOD.

HERE'S WHY:

1. SPARTAN® CHASSIS

With more than 30 years of custom chassis manufacturing, Spartan gives us the industry's premier foundation.

2. EXCLUSIVE X-BRIDGE™ FRAME

Our exclusive X-Bridge frame adds even more floor strength and structural rigidity, eliminating chassis flex and twisting; with it, the suspension—not the chassis—absorbs road shock and vibration.

3. FIVE-INCH-THICK FLOORS

The industry's thickest floors starts with several layers of plywood for dramatic reductions in energy transmission, noise and vibration. Cabinets are screwed directly to the wood and tile is laid precisely around them; other manufacturers place cabinets on top of the tile, causing squeaks or cracking.

4. RESIDENTIAL-STYLE WALLS AND ROOF

Our roof combines crowned aluminum truss rafters on 16-inch centers with Flexfoil®, fiberglass insulation and 3/8-inch plywood decking. Our walls, along with our front and rear caps, feature tucked-and-glued batting insulation—the same kind of fiberglass insulation found in sound-absorbing theater rooms.

5. MONOTUBE GAS PRESSURE SHOCKS

Designed specifically for luxury motorcoaches by Bilstein®, these shocks have 228% more surface area than twin-tube shocks for greater sensitivity and control. They virtually eliminate excessive sway and self-adjust so you don't have to change settings.

6. MICHELIN® MOTORHOME TIRES

One of the most trusted names in the business, Michelin's motorhome tires are designed for unparalleled fuel efficiency, high mileage and precise load control.

7. DUAL DIESEL EXHAUST FLUID (DEF) FILL PORTS

DEF fill ports on both sides of the coach for convenience (on most floorplans).

Gross Vehicle Weight Rating (GVWR): The maximum permissible weight of the motorcoach, including the Unloaded Vehicle Weight (UWV) plus passengers, personal items, all cargo, fluids, options and dealer-installed accessories. The GVWR is equal to or greater than the sum of the UWV and the Cargo Carrying Capacity. Gross Axle Weight Rating (GAWR): The maximum allowable weight each axle assembly is designed to carry, as measured at the tires, therefore including the weight of the axle assembly itself. Gross Combined Weight Rating (GCWR): The maximum allowable combined weight of the motorcoach used as a tow vehicle and the attached towed vehicle.
