STARCRAFT

Dating back to **1903**, Starcraft was founded as a farm equipment manufacturer, then added marine manufacturing to its lineup, followed by tent campers in 1964. Since that time, Starcraft has earned its reputation as a well-established manufacturer of travel trailers and fifth wheels. It's a safe bet to say that a name dating back 117 years, and a leader in the RV industry for over 50 years, will continue to prosper. With leading-edge product innovation and a customer-first focus, we look forward to seeing what the future holds. Undoubtedly, it will include ***Camping, Pure and Simple.***

Unloaded Vehicle Weight (UVW): Sometimes referred to as "Dry Weight," UVW means the typical weight of this trailer as built at the factory. The UVW, as used in product literature and other promotional materials, does not include cargo, fresh water, propane, options or dealer-installed accessories. Hitch Weight (HW): The hitch weight, as used in product literature and other promotional materials, does not include cargo, fresh water, propane gas, options or dealer-installed accessories. The addition of these types of items will either add to or subtract from the stated hitch weight. It is important for your safety and enjoyment that your tow vehicle be adequately sized and equipped to tow and handle the GVWR of the RV you select. Review weights and rating of your tow vehicle and consult a competent advisor for questions or advice. Whether you are new to RVing or a veteran, get a feel for the performance of your tow vehicle before heading out on the roadways. When you tow an RV, you must drive differently than when you drive a single vehicle. Practice hooking up, driving, backing up and landing in a safe environment or seek out professional instruction. Starcraft affixes a weight label to each RV which lists weight information for that vehicle. See specifications chart on the respective pages of this brochure.
